

# BA **INSiGHT** for Microsoft Teams

Increase Teams usage and adoption:

**Go to Teams**

**Live in Teams**

**Never leave Teams**

BA Insight for Teams, moves Teams away from a chat and collaboration application into an AI Driven Enterprise Search Platform providing instant, contextual, enterprise-wide search results that are related to the specific interaction the user is having. It is integrated with your Personal Tab, Team Tab and Conversations Tab

## **Without leaving Teams provide access to information from:**

### **Microsoft Applications:**

Exchange, Dynamics, SharePoint, OneDrive, Yammer

### **Line of Business Applications:**

Collaboration Tools (Confluence, Jive)  
Sales and service management (Salesforce, ServiceNow)  
Document Management (Documentum, Veeva Vault)  
Databases / Data Warehouses (SQL Server, Azure DW)

## **Leverage Azure Cognitive Services to:**

Incorporate image and video in search results  
Document insights for better search results  
Enable natural language search

**Help your customers migrate from other chat and collaboration applications such as Yammer, Jive and Confluence by providing the content from them in search results while using Teams.**
