BA Insight

Unlock AI Success with Copilot Connect

Upland BA Insight is the integral foundation for enabling AI success. Our pre-configured virtual machine will be available via the Microsoft Azure Marketplace and allows for quick and efficient deployment of Generative AI into your external ecosystem.

Why Copilot Connect?

BA Insight's Copilot package ensures a fast return on your Copilot 365 investments. As you embark on your Generative AI journey, a solid structure focused on connectivity security, and scalability is critical. Our Copilot Connect package enables a swift deployment of Copilot 365 into external repositories such as ServiceNow, Salesforce, Confluence, and more. The ability to "chat" and leverage your content for distinct Copilot 365 use cases outside of M365 amplifies productivity and increases the top line of your business.

How do you deploy?

Deploy Copilot Connect through your own unique environment, allowing your organization to keep content in your own tenant. You can deploy directly through the Azure Marketplace.

Platform availability

- Can be purchased via the Azure Marketplace and deployed in your tenant, allowing for the most control over your newly deployed project

- Deployment within customer environment/ tenant: $15,000

What do you get in Copilot Connect?

- Choice of one Connector, including: Confluence Cloud, File Share, Google Drive, iManage, NetDocuments, Salesforce, ServiceNow, Veeva Vault, and Website Crawler. Reach out to us to learn more about custom-tailored PoC options.

- Item level security

- Guidance around content curation for Copilot 365 use cases

- Metadata enrichment through BA Insight's AutoClassifier

Duration details

- The duration of PoC is 30 days from confirmed deployment for up to 100 users, unless other details are outlined

- Email sent by BA Insight's Services team will begin the deployment process

Let's connect to discuss how BA Insight can future-proof your AI investments.
